IN MEMORIAM.

ADOLPH LIPPE, M. D.

N announcing to the homeopathic profession the sad news of the death of Dr. Adolph Lippe, we feel sure our readers will mourn the loss of a friend, a leader, and a teacher. For it is scarcely overstating the truth to say that in Dr. Lippe's death, Homeopathy loses its foremost therapeutist and its most successful prescriber. A most worthy successor of the great Hahnemann, whose teachings he so successfully followed, Dr. Adolph Lippe was the compeer of any of the great men who have made the name of the "old guard" so illustrious.

Dr. Lippe had not been in good health for some weeks; he had been suffering from rheumatic troubles and had been more or less confined to the house by these ailments during the past month or six weeks. But until Friday night no alarming symptoms had been noticed. Having exposed himself during the past few days of raw, inclement weather, a bad cold was contracted which speedily developed into a severe case of typhoid pneumonia, which medicines were powerless to check. From the first initial chill to within a few moments of death, Dr. Lippe retained consciousness and never seemed to have any hope of recovery. He said just a few hours before he died: "The medicines do no good, they only palliate." And so it seemed. During the last two days, Dr. Lippe, though so ill, was all the time throwing out hints for the treatment of his case. For instance, he would say this symptom indicates Nux mos., or this one, Natr. mur.; and so he would go through a list of remedies, pointing out with such rare skill their characteristics. But all without avail! Taken sick at 3 A. M. Saturday morning he died Monday, January 23d, at 9.45 A. M.

The funeral took place Thursday, January 26th, from his late residence, 1204 Walnut Street. The body was incased in a neat cloth-covered casket, and upon the plate was the simple inscription: "Adolph, Graf zur Lippe-Weissenfeld. Born, May 11th, 1812; died, January 23d, 1888."

The funeral ceremonies were celebrated at St. John's Church, Thirteenth Street, above Chestnut. There was a large congregation present at the solemn services, many of whom were friends and former patients of the late distinguished homoeopathic physician. The main altar and candlesticks were shrouded with the emblems of mourning, while the celebrant, Father Matthew F. Hand, was clad in black vestments. There were present in the chancel with the celebrant of the Solemn High Requiem Mass, Father P. R. O'Reilly, the pastor of the church, and Father E. V. Le Breton. As the cortege entered the church, Carl Wittig's Funeral March was rendered by the organist. The casket containing the remains was carried to the head of the centre aisle and placed upon a bier directly in front of the main altar, burning tapers surrounding the casket. The music was Ohnewald's Requiem Mass to the Sanctus. "Rest in the Lord," from Elijah, was sung as an offertory by Madame Osborne. The Agnus Dei was also sung by the same lady. After the Absolution of the Body the choir sang "Jerusalem, my happy home," and as the cortege passed out of the church Carl Wittig's Funeral March was again given.

The pall-bearers were J. G. Watmough, George Blight, Coleman Hall, H. W. Catherwood, Dr. E. J. Lee, Dr. Walter M. James, and Dr. P. P. Wells. Among those present in the congregation were Rev. Drs. Phillips Brooks, of Boston, and Charles D. Cooper, of the P. E. Church of the Holy Apostles of this city. The interment was at the Old Cathedral Cemetery.

Dr. Adolph Lippe came of an illustrious family, being a member of the old and noble German family of Lippe. He was born on the family estate of "Sée," near Gœrlitz, in Prussia. His parents were Count Ludwig and Countess Augusta zur Lippe. He was born on the 11th of May, 1812, and was therefore in his seventy-sixth year. He leaves a widow and one son to mourn his death; in Germany there survive him several brothers and sisters. On January 1st, 1885, Dr. Lippe lost his oldest son, Dr. Constantine Lippe; having two weeks previously (December, 1884) lost his only daughter. He never recovered from the severe shock of this double bereavement.

Dr. Lippe was educated at Berlin, and it was intended he should follow the legal profession, but his natural taste and talents inclining him to medicine, he came to America in 1837. He studied at the Homeopathic College at Allentown, then the only one in this country, and on the 27th of July, 1841, received his diploma at the hands of the late Dr. Constantine Hering. The Doctor first settled at Pottsville, and practiced for a time there, but subsequently established himself at Carlisle, where he remained for six years. Having distinguished himself through his treatment of the epidemics prevalent in the Cumberland Valley, he came to Philadelphia, beginning then his brilliant career in this city as a homeopathic practitioner and teacher. Dr. Lippe was remarkably successful in the practice of the healing art,

seeming to be peculiarly fitted by nature for his profession. Indeed, it has fallen to the lot of few physicians to practice medicine so successfully as did Dr. Lippe. His many wonderful cures during a practice of over forty-six years have won for him a grand reputation, besides giving relief and comfort to hundreds whom less skilled physicians had abandoned in despair. Dr. Lippe was indeed a born physician; he possessed to a remarkable degree the instinct of the true physician, sometimes discerning almost at a glance points which others observed not at all.

From 1863 to 1868 Dr. Lippe filled the chair of Materia Medica in the old Homeopathic Medical College of Pennsylvania, which his rare knowledge of the materia medica enabled him to do with peculiar success. Although always engaged in the busy work of a successful physician, even to within three days of his death, Dr. Lippe managed to contribute most copiously to the current literature of our school. He was the prime mover in establishing several homeopathic journals. Among them may be mentioned the late Organon, the Hahnemannian Monthly, and The Homeopathic Physician. Even to mention by title his numerous papers would require almost a volume, so unceasing were his labors. In style he was positive, even to being dogmatic; the reason for this is readily found, it being due to the wonderful success he had had for a lifetime, in curing, or at least in relieving, all manner of sickness by a strict adherence to the Law of the Similars. Therefore, to doubt its efficiency in any case of disease was, in his eyes, almost a crime. And few would be more tolerant who had had his unique experience. He was an active or honorary member of numerous foreign and domestic societies. By the death of Dr. Lippe Homeopathy loses its most successful and its most celebrated physician, whose place will long remain vacant.

Numerous letters and telegrams have been received from Dr. Lippe's many friends, all expressive of grief and sympathy for the bereaved and of admiration for the deceased.

RESOLUTIONS

ADOPTED BY THE HAHNEMANNIAN ASSOCIATION OF PENNSYLVANIA.

The following preamble and resolutions were adopted by the Hahnemannian Association of Pennsylvania, at a special meeting called January 24th, to take appropriate action on the death of their deceased colleague, Dr. Adolph Lippe:

WHEREAS, This Association has heard with the deepest sorrow of the death of our venerable colleague and friend, Dr. Adolph Lippe; therefore be it

Resolved, That in the death of this veteran physician (one of the pioneers of Homeopathy in America) this Association has sustained an irreparable loss, the homeopathic school loses its ablest physician and greatest therapeutist; the public at large, its most successful practitioner and wisest counselor.

Resolved, That by his untiring labors in the field of homeopathic materia medica, by his teaching, when a professor in the old Homeopathic College of Pennsylvania, by his unceasing contributions to the medical journals of his school, and by his example as a practitioner, Dr. Lippe did more for the development of Homeopathy in this country than any other physician, with the single exception of the late Constantine Hering.

Resolved, That his great industry, his sound and logical reasoning, his seeming intuitive perception of the trend of diseases, and his unexcelled ability for the analysis of drugs, were the causes of his success and placed Adolph Lippe, for many years, at the head of his profession as a physician and teacher.

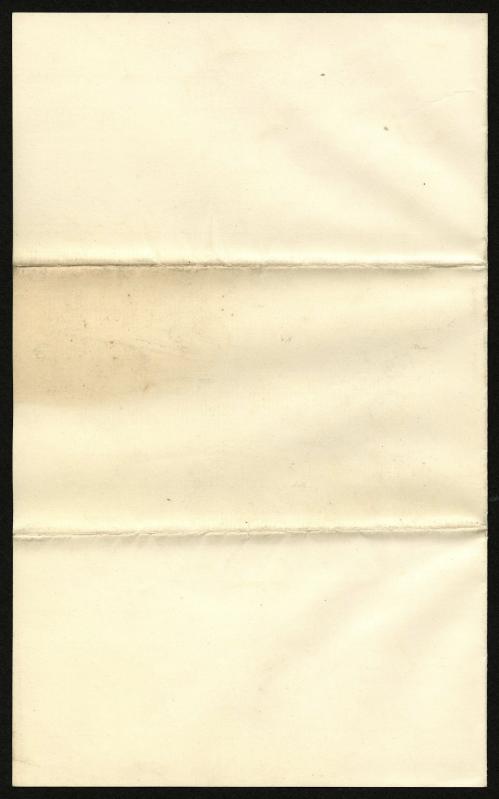

Resolved, That his ever courteous manner and constant readiness to assist his professional brethren by his wise counsels have endeared him to his colleagues and will cause the name of Adolph Lippe to be long held in affectionate remembrance.

Resolved, That the members of this Association attend the funeral in a body.

Resolved, That a copy of these resolutions be transmitted to the family of our deceased friend and colleague; that they be also published in the Public Ledger, of this city, and in the medical journals.

Copy. 1314 Chestruck Street Whiladelphia March 2nd, 1868. To the President of the Trustees of the Homeopathice College of Hennsylvania. So the session of the H. Medical follege is now closed, I beg to offer a few remarks to the Trustees on the management and improvement of this Institution. First, With respect to the requirements of the Sudents, I would suggest that more work, more dissection and less lecturing be the order of the course. 2 nd The Students regime that Mistivifery cases be taught in practice as well as theory . -3 ed Demonstrations had the use of the necessary instruments, in the place of verbal explanation. 4th A connecting principle in the Lectures, so that the Lecture of the Chair A, may not clash with that of Chair B. It And that the Professors be gentlemen, incapable of profiting by the wants on Jears of Mudents. To meet these requirements it is necessary that

the Andends have accept to a large and Hornebfallie Dospital, and to out door and undoor pudivifery lases, The rule in Sondon is that a Student going up for learning tion by the follege, takes a certificate of having attended at least 50 midnifery cases and the lectures. The want of the connecting principle referred to poura /4/. leads to a disparity of doctrine and of leaching amongst the various chairs. The Consequence is that, The Students laugh at the whole ques, - As the Faculty is now constituted, I glutlemen tuest who possibly have never met before and who have bery divergent opinions on the leading freets of Medical Science; to obviate this conflict of opinion a plan should be adifited his for to obtains in the Faculties of Europe, A Lecurer to the Faculty is appointed from among the Chairs, and it becomes his duty to acquaint the Faculty with the many recent facts and theories, which Incey have become recognized in the principal schools of Curope and U. S. If the Faculty endorse the lockrine by a bate of the Majority, it then forms part of the fourse of Studies, and all the Professors are equally prosper and Speak in harmony. - Thus pecent investigations in Europe ascribe the non-coagulation of the blook within the body to the presence of a Substance Called Globuline, and in our recent course, this

Local so described by the Physiological Chair, other Chairs described the matter differently. Which were The Students to believe? The Faculty should have the power of expelling by a two thirds vote any Professor who may act in his subtracuese with the Shidents or his brother brogessors in any way unbecoming to a fentlemen and a Inant of honour. In Conclusion for this part of the subjects I would suggest that the applause should be abolished, and that the Shidents listen in sitence to the Lectures. The desire of applause leads to flap-trap, Course and ill limed jokes, and farcastic allusions to opposing sechs. - Will in back laste, subversive of discipline, and leading to the degradation of the Profession in the opinions of the better class of No demonstrations of any kind are allowed to the Medical Schools of Elirope. Ment, as to the Monetary and financial suterests of the Pollege. I The plant at present adopted with reference to the lapenditure, is that each Professor spends money and then lends in his afe to be approved by the Haculty. - The rule should be that no money be expended by any one without a previous Echemate.

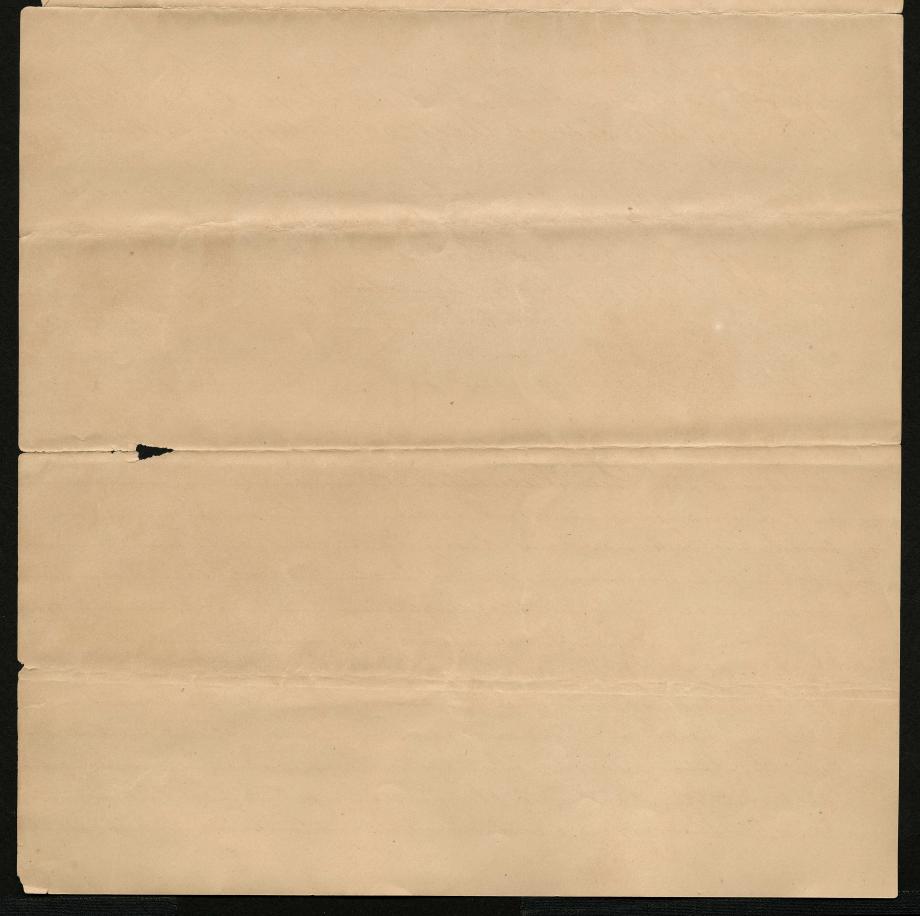

This Estimate should be referred to a Sinance Comittee of the Trustees and if approved, then acted on. you now have scheming and preespousibility, both bad qualities where money is concerned. 2 and Is to the furrent capenditure, here a suspense account is wanted and eterns such as construction of drains, furnaces, be. Se. should be charged to Suspense age and the amount spread over a terres of years. The deficiencies of the Hahnemannian Brouthly, home heen made up by fontributions from the larnings of the Faculty, quite contrary to all business. notions, which would place the responsibility on the Shareholders in the Stock of the Journal. to on the Shareholders in the Stock of the Totage. - Contrary also to right principle and to the byelaws. The Journal as at present managed is takely to permain a such for all the earnings of the Gollege, and thus the Professors who give time, takents and services, are soronged, and notlikely to be again willing to renew their efforts in this connection. - This Seption the surplus how gone to the smolument of one Professor who by his Schening has tranaged to devertthe proceeds suto his own pocket, without Kendering any latesfactory afe or keeping any regular books, and who makes it a books that on a previous occasion when legal lughing

was threatened by the adverse party," The burnt-all his bills and pourhers." For emplely, I have been delided buts a large expenditure of hime and actual capital in the Introduction of Anadomical figures and other improvements alguired by a besil to the French "Exposition", these were duly let forth in my Subroductory addrep, and quickly spread over the Land for at my own lost I had fine hundred topies printed | - the result has been to Confirm many havering Students in the Shoice of College. These benefits to the College have resulted in a total loss to me. Meat, as to the Examination of the Students for the degree. By the present practice, Each Peopessor examines each Student reparately and in private. - This leads to abuse - The Student is fearful and auxious and perhaps half educated. How is he to get thro'? If he does not he loses his time and money. He seeks a Professor who he thinks is friendly to him. The Professor fells him " you shall howe your degree - Swill fee to that for you - Make yourself lasy, you shall have your degree?" When the Diploma is offained the Student traturally thinks he owes it to his friend in the Faculty and is grateful accordingly.

The better plan would be fas is the practice in London

faris & Vienna / to examine the students for the presence of the Faculty or of a quorum of the Professors, and after the examination to bate by Ballot at once. - The Faculty art as a check upon each other and the Student finds that The has to pass; by means of his knowledge of his profession and not by intrique. Taskly. The future success of the follege in my opinion will depend on the reforms suggested above, but even these will be useless unless the humber of Students is sufficient to pay interest on Capital and leave a luplus. To do this, and to divert the Stream of Students hitherward I heg to suggest the following plan. There are 3400 Homeopathic practitioners for the U. S. and a Considerable gumber in Canada and the adjacent folonies. - I propose to appoint These practitioners agents for the follege, and to supply them with breedful prospectus for distribution and The information as to the course of Study, Unatomical liquies, Microscope & he - I assume that Looner or later these practitioners become preceptors or are consulted by young men or their friends as to the best Course and lottege for acquiring a Nomeopathic medical education, These services should be paid for by a Commission of 5 % upon the feel of the Students Recommended. - To meet this lackenditure, an addition

should be made to the cost of the Tollege fees. of course in the payment of these formissions the strictest good faith and promptitude is necessary I have no doubt that these and Similar means, economically carried out, from four to fine hundred tudents enay be obtained every year, and so confident and I of success that I should he willing to moest capital in this of in a similar sustitution Carried out upon the above principles. Trusting you will do me the favour to lay this Communication before your fo trustees, Memain Jis, With respect your obedient- Servant-The Arrowsmith Inf.

Homocopathic Hospital. Medical education which is not based upon bedside practice and observation must necessarily be imperfect. This is the universal acknowledgment of all civilized nations. It is also necessary that the Hospital be of large suge with a minimum of 200 and a maximum of 400 beds, in wards containing from 8 to 12 heds. A part of these might be on the self supporting plan carried out in Paris. The wards should be light and dry, well-bendilated and warmed. The central offices should contain dissecting, operating, post-morten and lecture rooms, also Museum Dispensory, bearination and buth Evous, with Howards accountants and board rooms. The Ritchen Chould be in the basement and the service by lifts. Such a building would cost approximately 250,000 if built of Colored bricks, two stories in height and of handsome design. The enclowment necessary to work such an institution would amount to a like sum together 500,000 f. The endowment and building frend should be kept separate. Now, how is this money to be raised? In the first place we require highly respectable and wealthy trustees. Men of mark and note in the community and known universally In the It. I. Men whose names and position in society will be a quarantee to the subscribers that the money which is subscribed for the institution will be faithfully Administered.

Having obtained the co-operation of influential and wealthy gentlemen as Trustees, we should require a committee of Management from the same class. The next step is a subscription to Insect the preliminary lapenses, which will consist of funting, advertiging, postage, a design for the building and a Colored lethograph to be hung up in every tharmacy, countinghouse and shop-window of those persons favorable to our cause In the U. S. and the usual secretary's expenses. Besides these means I propose to obtain the cooperation of the chergy, Life Assurance ligents, and the Ladies of the U. S. I dould also appoint the 3500 Homosopathic Practitioners how practising in the U. J. as agents, they would each of them work with energy in the cause, because they must all regret that neither the U. S. nor Europe afford a similar Institution, and must desire and feel proud that his own fountry should be the first to mangurate and let The example in so landable and necessary an undertaking. I propose also to make it the interest of each practitioner In the U.S. by allowing a commission on the Subscription of say 5 %. It would be the duty of the tractitioner to distribute prospectuses, Sithographo and subscription lists. Testimate that each Doctor would visit as a minimum 100 families and that each family would give a dollar. To check these Agents it is necessary that Banks for receiving subscriptions be appointed in every large town of the Union and that authorized lists of the subscribers be advertised in the local papers in each town

and district so that the subscribers may see that their money is acknowledged and has been faid in to the bank. The contributions of the wealthy members of the community should be advertised in the leading journals of the great commercial It may be objected " But why should the whole of the U. I be called on to subscribe for the erection and evidorement of an Institution which is local in its site and benefits?" I answer that it is within my experience to have met with many distant communities who have had lad cause to lament the inefficiency and want of Homocopathic Practitioners. Any undertaking bending to improve the class and to supply deficiences by sending forthreally able Surgeons, acconcheurs and physicians would mest with the general support of any enlightened community. formion levise will also tell them that the experience from 400 heds can only be obtained in lities of the first magnitude where the beds will be filled. Hence the fential Hospitals and Colleges of Paris Sondon, Edinburgh and Dublin are supported by Contributions from the whole community. I have not a doubt that by the above or similar means a million of dollars might be raised for such an object. And have we no duty in this matter ? I submit that we have. The duty is ours of providing not alone for the daily wants of our brethren thirsting after prowledge, but also to provide some durable

memorial of our unity of effort of our appreciation of the work of our great Master Hahnemann and of the work he has left for his followers to do. That man must be low in intelligence and mean of soul who is insensible to all feeling of pride in the construction of a noble edifice dedicated to the claster of the Healing Seliand to the work appointed to us by the Master of Hearts Whom we all serve. Our forefathers built as well as wrote for posterity. The last living nature of their institutions places in the back ground every calculation as to locality, hime and age. Whether they built or wrote they have let his the generous example of providing for The instruction and the recovery and welfare of generation upon generation. Shall we not prove ouselves worthy Is great an example? Should you conclude to assist in the great took and to aid his to promoting the object in biew, may I request that you will sanction the insertion of your have in the list of gothis institution which is now being prepared for the Prospectus. W. LArrowsmith my Hon Sec.

Memorandum with respect to a hew and commodious Hornsopathie Hospital. Medical Education which is not based upon bedside practice and observation hust necessarily be unperfect. This is the universal acknowledgment of all Civilized nations For the purposes of Education it is also necessary that the Hospital be of large size with a minimum I four hundred and a maximum of six hundred bedd, in wards containing from eight to twelve beds. a part of these snight be on the self supporting plan Carried out in Paris. The wards should be light, airy, well-bentilated and warmed. The fentral Offices should contain dissecting operating, post mortem and lecture rooms to museum, also the Dispensary and Iscamination prome, with the Stewards. Alcountants, and Board hooms. The Ritchen should be on the basement and the service should be by Lifts! Such a Building would lost approximately. 250, 000 8 if built of colored briefs and ofhandsome design, two stories in height. The ludowment hecessary to work such an Institution would amount to a likellum, together 500,000 B. The endowment and building funds should be Rept separate.

Now, how is this money to be raised? In the first place we require highly respectable and wealthy Trustees. Men of track and note in the Community and known universally in the I. S. I think we should have no great difficulty in finding them for my experience tells me, thatgreat men will lay hold of great enterprises, more readily than of small, in fact I have heard it is an aphorism in the London Stock Market, that the greater the capital your ask for, the more certain you are to get it. Having obtained the Co-operation of influential and wealthy gentlemen as Trustees, we should require a formultee of management from the same class. The reach step is a subscription to meet the Welinmary expenses, which will consist of printing, advertiging, postage. Il Design for the Building and a colored Likhograph to be hungup in every pharmacy, counting house, and Shop window favorable to our Cause in the U.S. I and the reducal Secretary's lapender. Besides these means Julist the flergy, Life Assurance agents, and appoint the 3500 practitioners as agents, who would work with energy in the cause because each of them, must regret, that heither the U.S.moz Europe afford a Similar Institution and mill destre and feel proud that his own fountry

should be the first to mangurate and set the Isample in so landable and necessary anundertaking but I peopose also to make it his sulerest in the following way. Each practitioner would be required to name the leading journal in his districtwith the expense of advertining; by inserting his name In the advertisement- we should connect him with a large undertaking, and this would give him a position in his neighbourhood. He would then distribute the prospectus, and lithographs and Subscription lists, and be energetic in the follection of Subscriptions upon which he would receive a Commission of 5 %. I estimate that each practitioner would visit as a minimum number one hundred families, and that lack family would give a dollar; the contributions should be published in the newspapers for Thave found that people require credit for their benevolence in this world, as well as in the next. The contributions of the wealthy members of the Community should be advertiged in the leading Journals of the great commercial centres. It may be objected, "but voly should the whole of the U. I be called on for the erection and Indownantof an Tristitution which is local in its site and

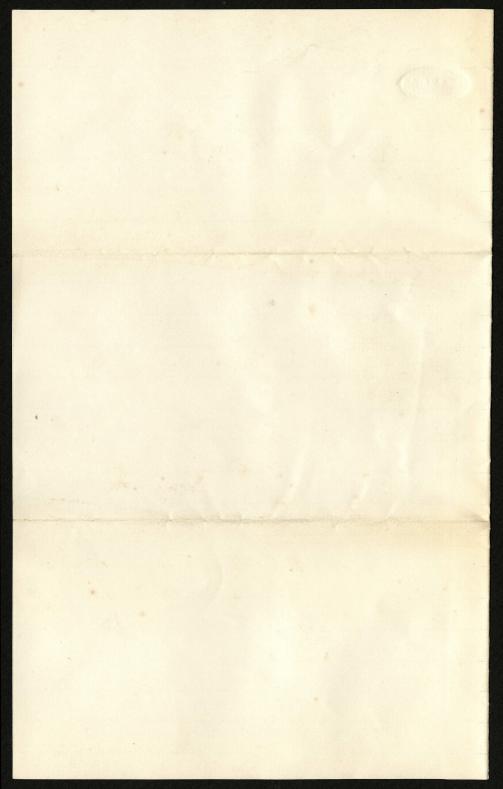

I answer that it is within my experience to have met with many distant families who have had sad cause to lament the inefficiency of Homeopathic Practitioners. Any undertaking hending to improve the class & to supply deficiencies, by Sending forth really able surgeons, Alcoucheurs & Physicians would meet with the general support of any enlightened the experience from 600 Beds can only be obtained in lities The first class, where the Beds will be filled. Hence the fentral Hospitals & folleges of Paris, London, Edinburgh & Dublin are supported by Contributions from the whole Commity. Santicipale that like causes will produce like effects but then the Establishment must be of that fapilal, Utility, and Efficiency, that all the inferior Schools become exhinguished. There not a doubt- that by the above or timilar. means a million dollars might be raised for such an object and I wish to recommend the Subject to the leading winds in this formunity. W. L. Anowsmith me hand 3 cd/68.

1204 Walnut Street

my dear dis.

your kind letter of the 12 inst. was duly Electived and has been fully considered in all its being, I have come to the conclusion that we line under a new dispensation and that Len: Frank has opened this new order of things when tostruck as his Key-note on the Juture motts of our people is. The will of the people is the Law of the land Under the will of the people he most Lurely means the will of a majority of the people. And the Amnerp. medical Callege of Pa have expressed their firm resolve to continue the good fight against a most wicked eveny, I am willing to go into it foremose, and as soon as the occasion permits (i.e. if we are fully organised) I shall take of my coal, and pitch into them without hesitation - of these curved Rebels do not run and of right & hearing or surrender before the 4th of march 1869 I shall give it up; and you may look for what is less of me among the Plains on the Battle ground. Mount truly Ad: Lippe. A.E. Keene

1204 Walnut Street Octat 302 1168. My dear lir. Please find Endored and without Comments. You have no doubt called the quarterly meeting for monday as to be held according to the By z Laws. But what of the Laws in these days _ the bidges of the Rupsine Court down to the Frand Juries do just as the "/arty" wants them to do - and all shanking between them do the lame thing as they please, law or no law - all this much lome to an End durily. May be Nov. 3 = will bring us new yours truly a Lippe.

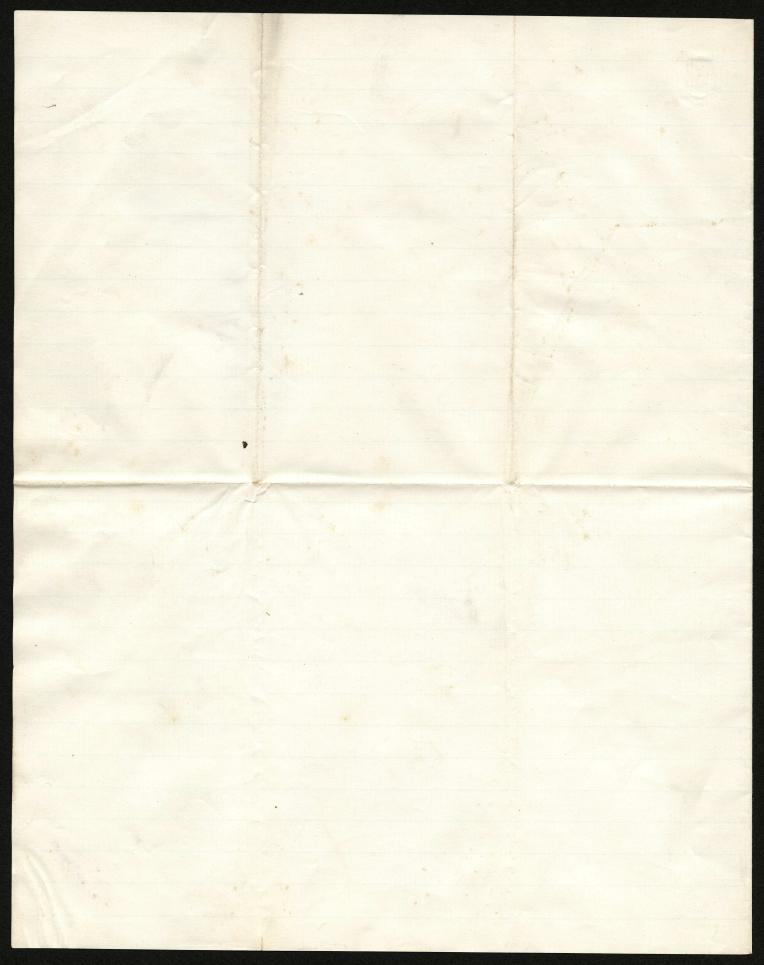

Philadelphia October 302 1868.

The Board of Trustees of the Formneapathic Medical Callyso Sentlemen College of Tennsylvania held this Evening I was appointed a Committee to lay before you the leasons for which the Jaculty is desirous you should rescind a resolution passed by your Brand on the 13 plum last, declaring it not to be right to pay out the funds of the Corporation any money for the publication of any Journals, Periodicals e.t. ". The Saulty asks you to rescind Said resolution, because they consider the Nahnemannian Monthly published by the Naculty of the tolly an enlegral part of the institution, the School would be less known without it jet would be out of the prease of the Faculty to lay before the medical Profession and the people in general the principles tought in the Vehral, and further the School would be unable to defend while against miorepresentations published by opposing Elements in the profession; and in fach without Such and Organ to the School

Could not be sustained at all,

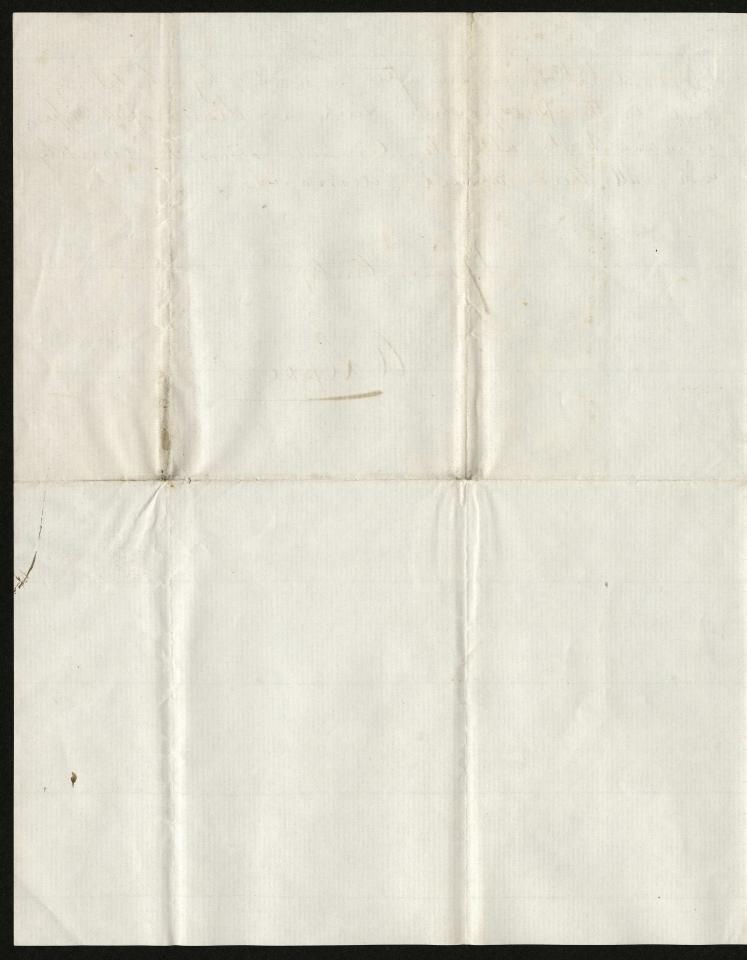

dery eispeitfully Jours Ad: Lippe.

1204 Walnut Street Der. 8th 1868. Not Official but let MrVV Palles read it my dear Vin Ol Second College Rebellion is upon us. At a Jaculty meeting some In days up which a violent attack of in the morning a reported thickpepter the Faculty meeting was annaumed in the the) a Committee was appointed to call on the Broaders of the Board and State that It mollatchery much have the money voted him by the Board or Else - the roulty would resign. The resolution was put on record in disquire but mol, lax posed the Lituation last night at the Faulty meeting. It shawe wants money or resign. Mrc. Clatchey demanded peremplony payment of all his dues - as a last resort to quiet the threatening outbreak I spend a resolution, That the Taculty thould advance (not wishing to commit the taculty as individuals as Schlors I mist) the money due & Mollatchen as Editor of the Huha minte pro Rata. The resolution parsed all voting in an afirmative but only & Fuernay & myself affered The pay so this lass resort failed of mel. is not only determined to resign but to disperse the Class - He is a very hot headed fourlish fellow. and will oreste much trankle, He statut in

plans terms that he should no longer work for the Hahn. monthly had that he had in his hand & 200 belonging to the Hahnemanning and that he was determined to keep then, and not pay the printer, keep the as well as all the Milland Franks in his promision till we pay their, of Endone you a note I received of might from & g. I find thought of writing has determined not to put any thing on paper I called on him. I told him that I was berfutty willing to pars with 185 Thans of Fann I controlled at its full value if he or any farty wished to Contrate, date or preserve the School Then they or he would not go in for a speculation had give willingly the fall value - and that the value could Easily he fixed by otherwise disintentent persons, accustomed to appraise Real Estate. He could -n-d Lee it in that light now Could be see the difference between a money = investment and a denotion of a good lauxe I regret very much that afairs are taking Luch a very unpleasent dury _ and had as it were a presentiment of it last dipring -Still we tried another Lersion and will me he Samed the disgraceful Spechacle to quit betwee & Louinal? That is what my

learned Calleagues are after i and by holding and in the prospective such a disgracefull affin unagine to be able to compell others to comply will all their about demands. your truly axippe

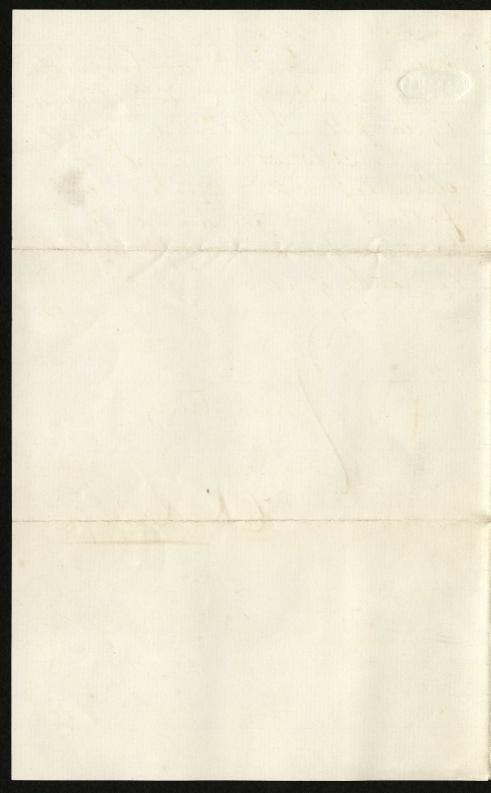

1204 Walnus Street Not official! Ser. 10 = 1868. my dear din. Caening has postponement open hostilities and I the has retreated for a time. I duppose they found that their assumed Position was not Vafe and are new occupied considering a Change of base Me has received this morning the Pro Kala advance of his claims as Calitor from 3 members q the Faculty I M. Farland & myself and he says he will not fight at present. How long the truce will last I Can not tell . are extremely anxious to have me and of the way in order that they may be able to nunage a run the talky as they plean finding me always in the way when they want

to commit about acts have proposed to their and yesterday to a third party anxious to Vane the Callege To sell to any party the 185 Frares now owned by myself or persons voting with me, i'e, which No of thanks I controle. The Condition of Vale Cark ... Brice? Not pretending to Know the Value of the Hock I propose to have the value fixed by one or three desinterested Experts aperson or persons well acquainted with Boperty Value and deducting from it the habilities of the Concern o. C. the Corporation to pay me my porkata portion _ in Cash _ I believe They are cornered and will come into my measures. If they do I know that of Month after the Consummation

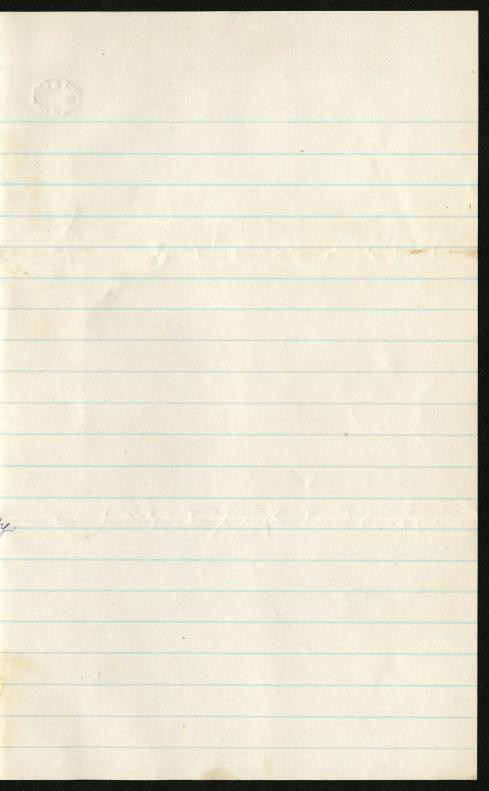

of that transaction the Corporation how do kindly a will menaged by the present Board will be in solvent - and one disaster after another entl fallow of aunt to Stand from under and be and of is. Truss truly

Dr Sippo to Trus tens Sept 25. 65 very respectfully

The Trustees of the Fornverpathir medical College of Temeglumia. The undersigned bego leave to ask that Is Starkey's 'elsignation' be accepted for the following reasons. 1 = . If Is Starkey had any complaints to make, it was that he was not consulted about the change of the Jurgical and anatomical chair. Is Wilson was also not consulted, but he has given no trouble. Uniple concessiono were offered to I Stackey, but he invisted on being assured beforehand of his election as Dean previous to accepting the nomination, and not receiving this assurance he has thought fit to resign. 2: The opposition to the nomination of De Frost displayed by Dr Starkey, and the textimony laid before the Board of Trustees is as univarianted an act as it is malevolent, It Starkey makes statemento unsustained by facto, although he was awaie that Is Frost had been for three years an in = mate of & Guernesey's house, and that & Guernesey recommended him, and having also read the letter from & Layne of Maine, the oldest and most respected physician of our thool in that State, who endorses & Frost, he fails in his promise of beeing vatisfied with A Frost's nomination should & Tayne endorse him. It Frost was no stranger to the profusion, he was well known as a Contributor of valuable Scientific papers to the midical Journals, and if & Starkey was not aware of it he can not have read our founds which a teacher in a medical School is certainly expected to do

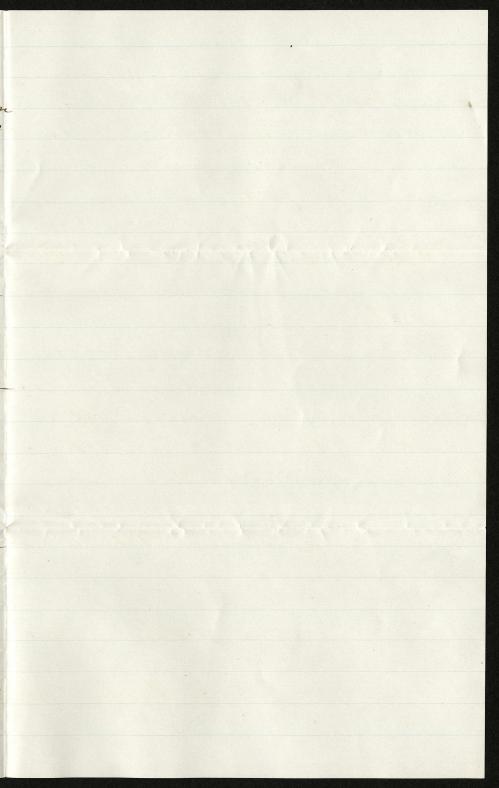

3 - The habitual "restlessness" if I may use this town for & Starkey's conduct throughout, his either and entire want of professional etiquette make it impossible for me to serve with him. I would have been glad had & starting accepted his nomination for the only chair he was judged competent to fill, but his own views on the Subject have been so annayingly thrusted before the physiano and also before the public that it has become impossible now to Continue the professional intercourse with this as heretofore Hence, as these controversies and writings have greatly interfered with more important daily duties, and as the organisation of the College has been much retarded through I Starkey's actions and as itwould be impossible for the present faculty to work harmoninusly were at starkey one of them I begyon to accept his resignation, Mour obediest Pervant Thiladelphia June 19 2 1865. Ud: Lippe.

Miladelphia June 15, 1865, M. M. E. Weene Esg: Dem Sir; are aware that on the Ind inst. I dent you, in answer to a mote from you of 27th ult, informing me of my appointment to the chair of Anatomy in the Hom. Med. Coll. - a letter, declining to accept the appointment. You are also aware that, at the instegution of a friend, I made two attempts to withdraw said letter of declination for the purpose of modifying the tenor of it: And that I have failed to ob lain it.

. I now, & hereby, make a formal request that said letter of declination be withdrawn & withheld; Und that the accompanying document be received accepted as my uply to your favor of 27th ult. by which I signify my acceptance of the Professorship to which I have been The appointment which I thus accept is announced in your com municuliar as follows: - "At a meeting of the Board of Truskes of the Homoeopathic Medical College of Cennsylvania, held May 10, 1865, I was unanimously elected Professor of Anatomy." Very Respectfully Yours Welankey M.D.

Philadelphia June 2, 1865, Mr. H.E. Weene Esq. Dear Sir; I have the honor to acknowledge the receipt of your favor of 27 ult, informing me of my appointment to the Chair of Anatomy in the Hom, Med I Will you please to allow me to state a few facts through you to the Hon. Board of Tristers, of which you are the Sec-1. That I served the College one year in the capacity of Prof. of Unatomy; Und that for the last four years I have served it in the capacity of Prof, of Surgery; with what ac ceptability, I am willing to leave it to either or all of the sea eral classes who have graduated during that time, to declare. 2. That wo word of complaint concerning my services, from either of my colleagues, (of which there have been eleven,) has ever come to my ears, ___ 3. - That no intimation was ever made to me that a change of the incumbents of the Chairs of Surgery & Unatomy into each others uspectively, was contemplated a considered desirable till two weeks after it was made, & conformed frery properly) by the Board of Trustees, 1. Excepting the present incumbert of the Chair of Surgery, (who, Thelieve, has long been anywar for the position,) that only two mumbers of the Faculty have sanctuned the change as made: Und that one half of the Faculty - excepting, of

course, said incumbent - were not advised of the intention of any such change until it rosas accomplished. 5. That I have cornestly tried to learn the cause, reason, or occusion of such an act; but have signally failed, -6. That having thus failed, - on my intimating to one of the two who have engineered this affair, that I would represent the case to the Trustees, he, with fearful imprications, threatened me with open hostilety. I that the only recommendation of the present Prof. of Surgery to the position which he occupies, - so far as it has come to my knowledge, is that he completely failed in the only course of lectures which he ever attempted; & that in a chair of less responsibility. With a knowledge of these facts before me, I must respectfully decline the honor of the position to which I have been appointed by the Trustees .-Signal . A Planky M.S. Late Prof. Berry, Hom, Med, Col I. S. Had I followed my inclination, I should have quietly resigned, without making any expose of the acts of two on three of my former Colleagues. But my interest in the Cause of the welfare of its institutions of learning, compets me make the attempt to lower the act intelligently in the affairs of the College, In furtherance of the same object, I have a word to say about the newly elected Prof. of Physiology. Learning that the candidale for the then bacant Chair was a

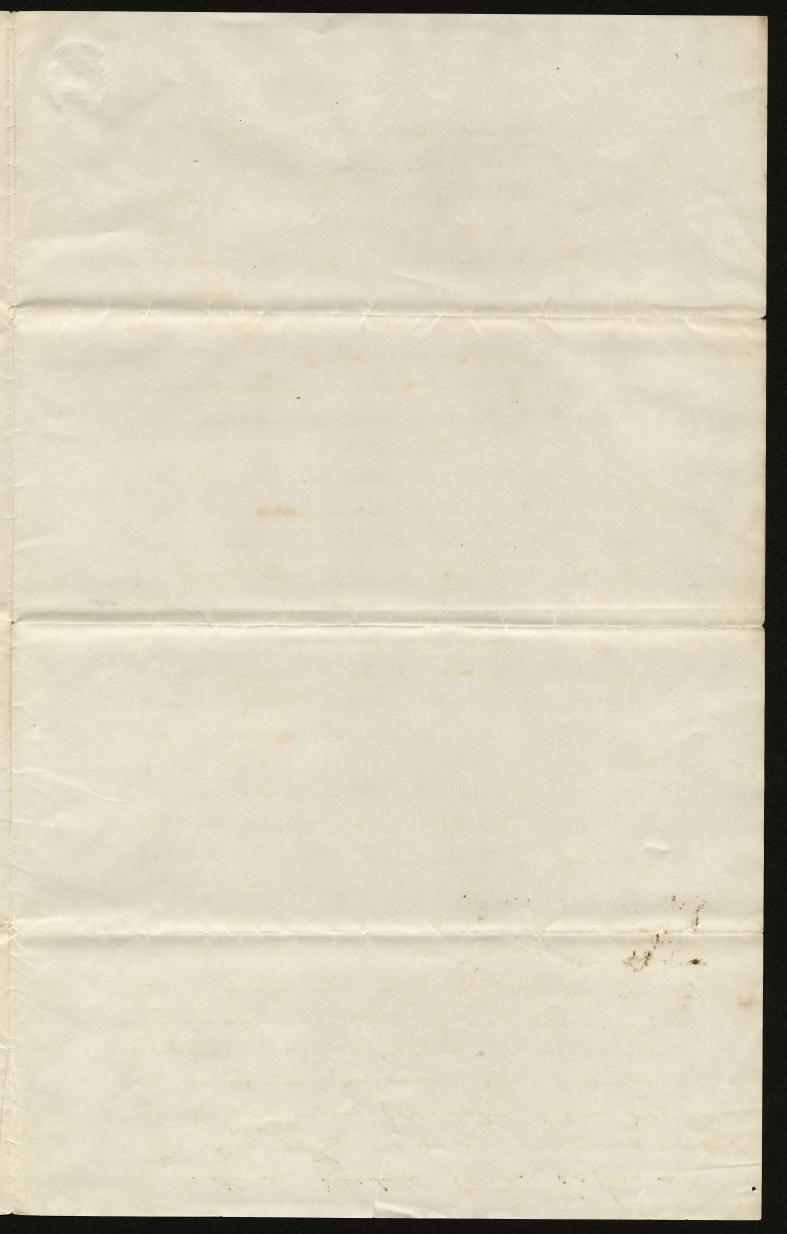

Dr. Frost, of Bangor; - of finding that only single member of the Faculty knew him even by name, The motion has never been canvassed in faculty meeting, I look it upon myself as a matter of common prudence, to institute proper inquires respecting his Suffice it to say that I have yet to see or hear the first express sion in favor of his films for the position, that might not with ignal printy he made concerning any one of hourty Homosopathic practitioners in this city, On the other hand, I have in my possession, testimonials from four independent & intelligent professional men, intimate acquaintainers of Dr. Frost. Neither of these testimonials is of such a character, that one would be werrented in engaging a porter-boy upon the strength of it. The writer of one of them, a Homocopath ie physician, says! In my opinion he is not the man for a Professor in your College, especially as regards his educational acquirements, & social standing," A second testimonal, from another Homoeoputhic physician, reads; I should be very sorry to see any Chair of its (Homoeopathy) institutions so much disgraced as to be occupied by him," And again; - He is certainly well calculated to cast a sher upon any institution which might be so unfortunate in its selection," These testimonials are at the service of the Gusters, I have only to add that the nominations of this man I the Prof. of Juryery were much by the same Professor who, (I firmly believe) has managed the change which has compilled me to resign, Wetarkey

Heury Ekeene Ey. Sir

Please do not have my

name announced as one belonging to the faculty of the Hom. College of which Great the Secretary, as I will positively decline to accept a chair in such a Faculty as that appointed by the Trustees on the 25 th mung Should such an aunouncement be made, I should be under the painful necessity of giving it a public denial

manh 25% 1867

CKering

To the Trustees of the Hom. Med. College of Pennsylvanice.

The undersigned would wish the trustees to accept the so styled, resignation" of B2. Starkey, because: when he had only to accept or to decline, he did neither, insisting upon molesting the Board of Trustees with communications, and to their greatest annoyance during their ardnows work of organizing.

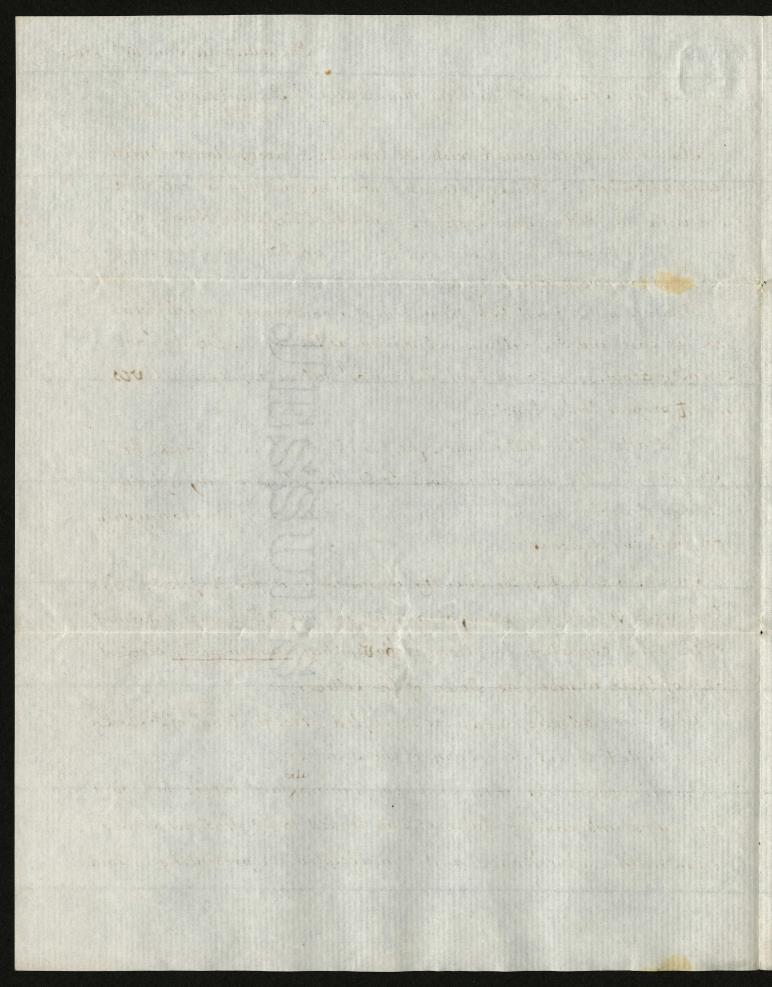

He gives himself out to be the victim of a conspiracy, which never was the case and decidetly is not so now, as the former faculty have silently acquiesced to all that their most active representations might propose to the trustees;

and after all the disturbances, he possibly could set to work, he finally made it a point of honour to be elected as Dean, declaring he would accept his nomination as a Professor of Anatomy, only on that conditions.

In answer to this, the Faculty consisting of all the Professors who had accepted held a meeting, organized, and while they were informed of the said condition, mentioned above, they unanimously elected one of their number as Dean of the College.

Ufter this had happened, the so styled , resignation" of De Starkey was hunded to the Secretary of the Trustees.

In this paper the soiled Starkey having laid before the Board some most unbecoming statements in regard to Dr Frost, who was nominated by the Board and had accepted, - representing in said

paper as facts what he knew was not the truth, that in their next meeting the Faculty unanimously agreed to declare it utterly unfeasible to serve in their urduous and self-sacrificing duties with such a member in their midst.

To which I give my full approbation; most respectfully

your obedient

Constantine Hering mD.
